Age Range: 6 and up

Grade Level: 5 and up

Customer Reviews

This is a new curriculum that our school system is using. As a parent, I love it. It is very simple and easy to understand, especially for those who have been out of school for a long time that have to help their kids with homework.

Great to have this book at home .My child uses this book in school. Since the kids are not allowed to take the text books home having my own reenforces lessons taught . Seen an improvement in attitude towards math. I recommend every parent to have a grade text book at home for any subject a child struggles with.

Its a bit boring with no color. BUT, this is not my primary text. This is the book you use to practice your skills. This is NOT sufficient for primary instruction. BUT, as morning warm up/bell work this serves a great role.

I brought both review and practice book which are similar so haven't used this one but I like the material and how similar it is to their current book gives a heads up.

This is really good book and my Son love it very much!!!

love the math book even thou my daughter hated it cuz she had math work to do while school was out for summer.

I love this book bcz very detailed explain math words and how to appicate on other questions.

same as my 5th grader has in school. I bought it to replace one that got ruined
